

Mohammad Waqar

CTO

As CTO of Galvia, Waqar leads a team of engineers and data scientists to build innovative AI solutions for some of the world's largest companies including Nestlé.

He is responsible for the technical product roadmap and the overall vision of Galvia's technology, using the latest AI approaches, tools and research to solve practical challenges for business.

With 12 years of industry and research experience, Waqar has delivered solutions around the efficient scaling of AI using Deep Learning, Search, Augmented Analytics, Conversational AI and Knowledge Graphs.

Waqar holds a MS in Information Technology from Institute of Management Science Pakistan.
